

JOB DESCRIPTION

AUTOMOTIVE DESIGNER

W MOTORS SAL DUBAI – DESIGN STUDIO

Department: Design Studio

Reporting to: Lead Designer / Project Manager

Place: Dubai, United Arab Emirates

SUMMARY OF THE JOB DESCRIPTION

As an Automotive Designer at W Motors Design Studio, your main duty is to work closely with the design team on all internal W Motors projects and external third party projects handled by W Motors. The below tasks should be covered enabling you to assist the Design Studio needs and requirements:

- Study W Motors brand identity and prepare a full presentation file for the Company that will serve as a reference for future design projects.
- Create a complete product vision for each new concept.
- Prepare complete design presentations for existing and upcoming vehicle models.
- Coordinate with the project manager and lead designer in order to deliver the project as per the client's requirements.
- Work on both exterior and interior design of current, ongoing and future projects.
- Support the design department with 3D CAD files development for all vehicle designs.
- Explore various design ideas to be implemented in future vehicle concepts.
- Explore various design ideas for accessories that complement each vehicle design line.
- Work closely with the engineering department to turn the design concept ideas into production phase.
- Research for new ideas and innovative technical solutions.
- Attend roadshows and events organized by the Company.
- Implement any additional tasks that might be required by Top Management.

SKILLS

Design

- Degree in automotive, transport and industrial design with a focus on automotive.
- Experience in the design of sports, luxurious and family cars.
- Proficient in AutoCAD, CATIA, Alia Studio, and other tools.
- Outstanding design intuition, creativity and communication.
- Ability to conceptualize, draw sketches and transform them into computer images.
- Sound knowledge of the stages of car manufacturing process.
- Experience in 2D and 3D design including Photoshop and Illustrator programs.

Language and Communication

- Fluent in English. French, Italian and/or German are a plus.
- Very good written and oral communication skills.
- Very good presentation skills including applicable attire for meetings and roadshows.

We are looking for a highly talented and energetic candidate who can work under pressure and deliver projects as per communicated deadlines.

The candidate is requested to be honest, discrete and trustful with regards to Top Management matters and confidential design projects.

Finally, the candidate should show continuous interest and updated knowledge about the automotive industry and direct competition. Versatility is required in order to ensure the implementation of various design projects and the fulfillment of the above job description tasks.
